K		+ Cal	cAddresses	

There is a Calc file with some names as example for addresses. The sheet has been named as "CalcAddresses". This name will appear as table name in Base.

🔟 💉	Database Wizard	~ ^ X		
Steps	Welcome to the LibreOffice Database Wizard	i		
1. Select database	Use the Database Wizard to create a new databa database file, or connect to a database stored or			
2. Connection settings	What do you want to do? O Create a n <u>e</u> w database			
3. Set up user authentication				
4. Save and proceed	Embedded database: HSQLDB Embedded			
4. Save and proceed	Open an existing database file			
	Recently used: Timbabase	0		
	 Open Connect to an existing database 			
	Firebird External JDBC Oracle JDBC Groupwise Evolution LDAP Evolution Local Spreadsheet dBASE Firebird External Text/CSV MySQL/MariaDB ODBC PostgreSQL Writer Document			
Help <	Bac <u>k</u> <u>N</u> ext > <u>F</u> inish	Cancel		

Start the database Wizward from the desktop. Choose "Connect to an existing database" \rightarrow "Spreadsheet".

		Database Wizard 🗸 🗸 🗸		
Steps		Set up a connection to spreadsheets		
1. Select database 2. Set up Writer Document o		Click 'Browse' to select a LibreOffice spreadsheet or Microsoft Excel workboo LibreOffice will open this file in read-only mode. Location and file name	k.	
	dsheet connection	/home/robby/Dokumente/LibreOffice/Bugs/Calc/CalcfileAddresses.ods	Browse	
3. Save a	nd proceed	<u>P</u> assword required		

Choose the path to the Calc file. The Calc file is named "CalcfileAddresses.ods" here.

10 💉	Database Wizard 🛛 🗸 🔨 🗙			
Steps	Decide How to Proceed After Saving the Database			
	Do you want the wizard to register the database in LibreOffice?			
1. Select database	Yes, register the database for me			
2. Set up Writer Document or Spreadsheet connection	O No, do not register the database			
3. Save and proceed	After the database file has been saved, what do you want to do?			
	Open the database for editing			
	Create tables <u>u</u> sing the table wizard			
	Click 'Finish' to save the database.			

You could register the database at this step. It will be automatically be registered with the name of the database.

<u>N</u> ame:	🗅 MyCalcAddresses.odb 🛛 🕙	~
<u>F</u> ilter:	ODF Database	~
Automatically select	filename e <u>x</u> tension (.odb)	
	Speichern 🛇 Abbree	hen:

Base file will be named "MyCalcAddresses.odb" at this step.
